

Hello,

I heard about the discussion today about the artificial turf that children play on and I would like to agree with the preventative measure to no longer install the artificial turf. I would also, in an ideal world, love to see it removed from fields children play soccer on-- in particular. I remember the stories of children goalies being treated for cancer. More than a coincidence.

I just wanted to share my agreement with ceasing to install such materials as their hazardous impact on our children is grave.

Sincerely,

Samantha Gray
