To Whom it May Concern,

My name is Robert Boyd and I am a 3rd year Naturopathic Medical Student at the University of Bridgeport College of Naturopathic Medicine. I am writing in support to H.B. No. 5300: An Act Concerning The Use Of Genetically Modified Organisms In Children's Food.

As a naturopathic medical student, I am well-versed on the scientific, peer-reviewed research regarding GMO foods and that there are both benefits and drawbacks to the use of GMO foods in agriculture. The debate over GMO foods will continue long into the future, however, what should not have to be debated, is the fact that parents deserve the right to be able to make an informed decision about what they feed their children. I am in full support of labeling GMO foods, especially in the cases of children and infant foods. These foods should be required to be labeled.

Thank you,
Robert Boyd
