

Members of the Labor Committee,

Please consider this email to be a letter of support for House Bill #5262 - Workers Compensation for presumptive cancer legislation.

Cancer cannot be faked. The science is clear and specific as to which cancers firefighters are likely to develop due to on the job exposures.

We're doing our part by constantly cleaning our turnout gear, our equipment, and our firehouses to reduce exposure. We are educating every single Connecticut firefighter on how to reduce exposure.

Please do your part by requiring Worker's Comp providers to pay our cancer-related medical bills.

Sincerely,

Marc A. Scrivener, BSBM, MM, 26.2, 50k
Fire Chief
