

My home was diagnosed with a crumbling problem April 2015. I had my house on the market and it was discovered by a realtor.

I am a senior recently widowed and unable to deal with the painful repair and ended up selling at a devastating loss. The asking price for my home was \$465,000. I sold for \$285,000.

My hope is that you will help me to recover the money lost due to faulty concrete.

Thank you for your consideration.
