

**"Support for Substitute SB 422"**

**I feel that CT needs to legislate and take a firm stand on preserving water for its citizens and making smart decisions about lowering the use of plastic in our state. I urge you to support SB 422. There is no solid reason to not support this bill except for the self-interest of Niagra or other bottled water companies. This is a smart bill that supports the citizens serviced by MDC, as well as future legislation for other bottling companies that may take advantage of CT. It seems obvious to me that there should be a watch dog committee for the MDC since they have not been representing the constituents who have appointed them to the commission. Again I urge you to make the intelligent and right decision regarding this bill.**
