

Planning and Development c Committee

I am appalled that we even need a bill to protect our water supply. Are companies allowed to go into state parks and cut down trees to make their company's furniture or go to town and state beaches and dig up sand to resell for patios? Of course not... this is just common sense.

Therefore we need to protect resident' rights.. We pay for our water and expect to have it even in a drought period. Water bottlers cannot usurp our water domains.

Also rescind water discounts and special sewer service charge discount for water bottlers - the clean water project charge.

In addition<

- Re-establish a citizen MDC (Metropolitan District Commission) watch dog committee.
- Impose a moratorium on any new large capacity agreements

As taxpayers and citizens our rights and resources should be/must e protected against business and coporate interests.Simply common sense and decency are the natural order of things.

sincerely
