

I strongly support Beth Bye's proposed legislation. I ask that the Committee evaluate the impact on the town of Windsor of heavy truck traffic, decreased water supply, and significantly increased waste water in our rivers.

Bloomfield's Town Council failed to consider the consequences of its decisions on Windsor's ability to plan for its own economic growth. The state needs to prevent one town's folly from irreparably harming the future growth of an adjoining town.

MDC has also egregiously overstepped its responsibilities. The MDC is **not** responsible for economic growth. Its mission is to protect the purity and safety of our water. For economic growth, there are organizations such as MetroHartford Alliance and the CT Dept. of Community and Economic Development
