WATER BILL SB422

AN ACT CONCERNING RESIDENTIAL WATER RATES, PUBLIC DRINKING WATER
SUPPLY EMERGENCIES AND SELLERS OF BOTTLE WATER

SUPPORT FOR SUBSTITUTE SB 422

To the Planning and Development Committee:

PUBLIC WATER NEEDS TO BE PROTECTED!!!! Water is the next "oil". It is a precious resource that belongs to the public. Please protect water for residents at all times, especially during times of drought. Citizens for years have been paying to build the system we now have and should not be paying more for a life sustaining resource than a corporation who profits and pollutes the environment. MDC should not have the control to be reckless with our water, there should be "transparency". The future of our water is essential to life, we clean our cars with cleaner water than most people in the world have for drinking. Let us not just give it away without much thoughtful consideration.

Thank you,

Kelly A Caruso
