Re: "an act concerning residential water rates, public drinking water supply emergencies and the sellers of bottled water"

Dear Planning and Development committee,

As a resident of Bloomfield Connecticut, a town served by the MDC, I urge the legislators to support SP 422.

Our water which may be abundant now, is not something that we can count on in the future due to global warming and climate change. we do not know if our grandchildren and our great-grandchildren will have an adequate supply of clean drinking water.

Your support will ensure that the residents that are served by MDC are not the ones that end up paying more than water bottling businesses who are selling our water for profit this bill will resend water rate discounts and special sewage discounts for water Bottlers.

Your support will ensure a moratorium on any new large capacity contracts until more time has been taken to assess this important situation.

Please support this bill, if not for us now, then for our grandchildren and their grandchildren.

thank you,

Patricia Barone
