

Date of Hearing: March 11, 2016

An Act concerning Residential Water Rates, Public Drinking Water Supply, Emergencies, and the Sellers of Bottled Water

I am writing to support Bill SB422, put forward by Beth Bye. As a resident of West Hartford, I was dismayed that the Niagra Company would propose to the town of Bloomfield a plan to build a water bottling plant, especially under the conditions that were granted without the knowledge or approval of all the citizens of the MDC area.

In a time, when climate change is so apparent ... ex. 81 degrees yesterday ... this is an unconscionable move not just for CT but for anywhere they want to go. Niagra itself must become concerned with its business, what motivates them and how they can change their future plans so as to benefit the planet, not slowly destroy it.

Sincerely,
Suzanne LaVoie
