

Dear Connecticut General Assembly,

SeeClickFix has been a factor for creating good in my New Haven community. Local maintenance and infrastructure needs have been met as a direct result of SeeClickFix and The City of New Haven's relationship.

Furthermore, SeeClickFix has brought a revitalized spirit of young energy rooted in creating better communities. SeeClickFix has been a bastion for young minds and job seekers in New Haven who want help shape a 21st Century Connecticut.

In a time where companies like GE are leaving to Boston in search of talent, SeeClickFix has bloomed in the heart of New Haven. SeeClickFix continues to amass success in communities across the country that have made a vested interest in wanting to become the smarter cities and smarter communities of the 21st Century.

Connecticut is colloquially called the Land of Steady Habits. Unfortunately, steadfastness has trouble keeping up with modernity. SeeClickFix is the future of community-government relations.

It is my sincere hope that Connecticut, as a state, can join the movement and encourage its homegrown SeeClickFix by offering its support.

Sincerely,

Coby
