

To Whom it may Concern,

I support SeeClickFix, as it's made a difference to my quality of life in New Haven. Unfortunately, cities like New Haven don't have quality control to oversee issue that need attention. SeeClickFix utilizes the community to give feedback and bring attention to issue that the city needs to deal with. In most cases, the cities want to provide for the taxpayer but isn't aware of certain conditions. SeeClickFix provides the forum to make complaints and the city usually feels an obligation to correct the problems. For the most part, it's been a success in New Haven. Please support this website and it's continued success.
