

Hello--

See-click-fix is a fantastic resource, one of the most positive thing, I've seen happen in Connecticut! It connects residents within blocks, neighborhoods, whole towns and cities.

It's an easy, low-cost way for regular people here in CT to reach local government and local government departments to solve problems that are evident to all, as well as to see what our fellow residents are doing to improve our quality of life. Every report to See-click-fix is up there for everyone to see and push for these quality-of-life issues to be addressed promptly by our local governments.

Please fund this (outwardly) simple yet elegant program throughout the state. Please let us "regular" people have a clear voice in our own communities, and in our own governance and accountability.

Sincerely,
Lisa Clyde Nielsen
New Haven
