

I've used the application SCF (see click and fix) . This application is awesome and it really works. I had two problem areas on my street and it was resolved not only fast but correctly. I have noticed that our neighborhood is in better shape than it was when we did not have the option to report our issues. This is a very effective tool that I can use at any time. I am a working single mom and when i get back from work all town offices are closed; this tool has given me the opportunity to report my street issues and again as i said I have seen the results not only the streets lights, holes, debris, etc the neighborhood is in better shape I am a proud homeowner of Windsor CT.
