

I'm emailing to give my support for SB 425: An Act Concerning Municipal Transparency, Efficiency, and Accountability. In particular I have used the SeeClickFix platform a number of times when there were things in my neighborhood in Branford not working; such as crosswalk signs, traffic lights, and pot holes. This is a wonderful, easy way for residents to contact someone about these issues and know it will be addressed. It certainly beats trying to track down if a problem is the town or state.

Thank you.
