

To the Public Health Committee

I support H. B. No 5460 concerning the administration of Glucagon in schools. This amendment will provide equal opportunity to all students and keep children safe. Many families have 2 working parents which inhibits them from being able to attend all field trips. It is imperative that non-medical school employees are trained and available for field trips to administer GLUCAGON in case of emergencies and allow Type 1 Diabetics to participate in all school activities.

GLUCAGON is a life-saving measure that should be recognized equally to EpiPen, CPR, and AED. I support the change to make GLUCAGON for non-medical staff "mandatory" along with the other life-saving measures as stated in Law 10-212.

Thank you
