To Whom It May Concern Regarding HB5534,

I am asking you to support the bill HB5534, an act concerning the practice of Naturopathy. The current outdated scope of practice for Naturopathic physicians must be updated, so more primary care services can be provided.

It will also support and strengthen the University of Bridgeport College of Naturopathic Medicine, which is the only Naturopathic program on the East coast. Please consider supporting this bill.

Thank you!

Sincerely,

Laurie Trupp
