

Dear Legislators,

I sincerely ask your consideration in passing bill SB 292 to license Behavior Analysis practitioners. This bill will serve as protection not only to professionals whom work as BCBA's/BCaBA's, but will serve to protect the millions of clients which are serviced through the field of ABA. It is with great perseverance that this bill has made it into your hands and through the evidence the field has shown to improve the quality and lives of thousands of people we wish you the best. I have been a resident of Meriden, CT my entire life and I am a proud New Englander with great respect for where are state has been, where it is now, and where it is going.

Unfortunately there are handfuls of practitioner's in the field today whom practice ABA without the education, certification and knowledge they need to be successful in improving the lives of many. Help us stop this.

May your decisions be guided with education and knowledge to make the appropriate choices.

Thank you for your time and consideration.

My deepest Sincerity,
Joanna Holowczyk, M.Ed., BCBA
