

Dear Public Health Committee members:

I am writing to express my concern over SB 300 which is being considered by your committee on 3/07/16.

This proposal raises high a very red flag with regard to future watershed protection throughout our state.

The area being considered is also unique ecosystem comprised of unique flora and fauna and should be conserved as such.

It must not be forfeited as part of a business proposal from a private entity.

Respectfully yours,

Susan Robinson
