Subject: Open Carry

I cannot remotely imagine having open carry of guns in CT (or anywhere else, for that matter). It only heightens anxiety, leads to potential misunderstanding and resulting reactions with "shots fired" and injury and death. WHY must we feel we have to protect ourselves with guns? We are not "people alone out in the country" who may have a legitimate need to protect themselves.

Encountering someone carrying a gun in a restaurant, store, church or other space will create major anxiety in me to be sure and for what reason? None.

Please vote NO on the open carry issue.

Sincerely,
Jane Currie
