Testimony

Before I would favor such a change ,I would like to know what the projected savings would be ,what would happen to the employees,would they become AAA employees or would they be laid off or would they be absorbed into other state depts. if this idea becomes realty then we the tax payers should see a savings in doing this.other wise i see this idea as lip survive to the tax payer,it about time our Republican Reps did something about what's going on in this state,I hear a lot of talk but No action.this November is election time maybe it's time for a change of Reps. Someone that will act not just complain. You seem to pick Little items to support like the Calvin Brown is sure which really doesn't amount to a hill of beans. Please pick things like all the free hand outs we tax payers have to pay for.stand up for what the tax payers want not what makes you look good so you can get elected again. Thank you
James Levins. A concerned tax payer
