Subject: Tesla sales

We purchased a Tesla Model S in 2013. The purchase was made on line via the Tesla website. It was an easy procedure. We test drove the Tesla in White Plains NY, making several visits. The car was delivered to us in NY. The service we have received for our car has been phenomenal. We have used both the Mt. Kisco NY service center and the one in Milford CT. The service our car has received has been the best vehicle service experiences we have ever had. It's no wonder that the established car dealers are afraid of some great competition! Please allow Tesla to sell in CT.
