I work full time as the administrative assistant in a preschool and I am a mother of a 7 year old.. I am currently taking classes working towards my Bachelors. The State of Connecticut wants teachers working in a preschool program to get Bachelors but I feel we need to be compensated and receive benefits to support our families. I need more security for my family especially once I graduate I will have student loans to pay. I speak for all teachers that we don't need any more cuts off the OEC budget that can compensate preschool teachers more money to support their families and to keep doing what they love as a career.
