Elizabeth Cestero

Elizabeth,

I hope this finds you well, I wanted to take a moment to thank you. I have to admit that when we first heard about the Community Health Center having services at school we were skeptical. Our son had a psychologist outside of school and we thought he was getting everything we could give him.

While we have nothing but good things to say about this psychologist, I will say since Connor started seeing you at his school, we have definitely seen positive changes in him. He enjoys having you at school, he finds it to be less chaotic because he doesn't have to leave school to get help, as a parent that is the best feeling. Knowing that our son is more comfortable while he is getting the help he so much needs makes it easier for our entire family. Also, the fact that we can come visit with you to touch base about our son during hours that work for our different type of schedule is invaluable.

To say the least despite our initial misgivings I can say honestly that I can't imagine what we would do without CHC at the school.

It's important to say also that the convenience is only a part of the reason we are so thrilled with having CHC at Lawrence School, my son actually comes home and shares the things he does in his sessions with you and that is a first for us. He is comfortable with you, he enjoys talking with you he trusts you and so do his father and I. I thank you for everything you have and continue to do with our son, our family is much better with you and the services CHC offers, in our lives.

Sincerely,

Johanna and Christopher Tessman
