

To whom it may concern,

The School Based Health Center in Danbury High School, Danbury , CT provides comprehensive services. Many of our students lack the resources that are provide from this awesome center. The staff is dedicated. They also promote there services with an awareness table in our cafeteria to reach the masses. They provide fact sheets on issues such as depression to suicide awareness . In the past they have provide our students with a week of guest speakers promoting wellness.

They have a social worker for students for counseling on a need to call basis. That is extremely important when students are in crisis and have place right in walking distance.

Please reconsider on funding cuts to a service in our community that is needed.

PS. They also provide educators in our building with resources to incorporate into our curriculum .
