AppTestimony

BUDGET - PLEASE READ!

We don't need a budget to expand I-95 & 84, we need a plan to employ people in a way that *preserves services* and requires that those who have benefited the most *pay their fair share*.

Connecticut should join with Attorney General Eric Schneiderman – NY, and Attorney General Kamala D. Harris - CA, who are working for an investigation into *all Exxon knew about climate change*.

Corporations are like a hungry animal with no brain. It means *nothing* to them that they turn the beautiful earth into a hellish place for life as we know it, *even for themselves*. But we can see our danger. Let's do something to help ourselves.

My small neighborhood voted down such infrastructure, but it's a drop in the bucket. The tentacles of natural gas are reaching within less than a mile of us.

With the climate changing at a *positively deadly* rate, we can't afford for the Connecticut AG, or AG Loretta Lynch and the Department of Justice, to give Climate Change anything but **HIGHEST PRIORITY!!**

Sincerely, Barbara Sarmiento - Farmington
