

Paula M. Talty, Ed.D. – Superintendent of Schools, Cromwell Public Schools

Cromwell Public Schools has had the benefit of partnering with faculty from Central Connecticut State University in the development and implementation of a PASS program. Students and teachers have found a positive impact on instruction, student outcomes, and student behavior as a result of this program. We recognize the impact of this research based program that links physical activity with instruction to support learning. Our classrooms continue to incorporate PASS throughout their daily activity and plan to expand the program to the middle and high schools.
