

CGA 2016 HB 5552 -

Dear Education Committee Members,

I am writing you with concern about HB 5552, An Act Concerning Special Education, which seems to create an additional hurdle for parents who already are having in addition to their increased issues with their children, who are not being educated in typical means, due to some diagnosed, or possibly not diagnosed issue.

This seems to create additional layers: creating additional time in which a child's issues would be managed, as well as usurping parent control. Parents have the inalienable right to determine what is right for their child. This bill, as written, provides no added value to the child. It seems to provide more work for a school district, and potentially delay improvement to a child's academic well being.

Please vote this bill down.

Sincerely,

Anne Manusky
Easton, CT
