

My name is Tom Burgess, long time resident of Wilton. Please strongly support SJ 4, a call to the U.S. Congress to prevent the sale of Plum Island for frivolous mansions instead of being preserved as one of the few remaining natural fragments left in our area.

Also, Connecticut needs better protection of its public lands. Please pass SJ 5, which would start the process of better, permanent protection of public lands such as parks, forests, preserves, etc.

Finally, I want to urge you to pass Bill 81 and designate portions of the Housatonic River as scenic and wild, which is how I hope it will remain forever. These are three common sense actions which cost no money and protect our state forever. Please make this happen!

Thank you,

Tom Burgess
