

I was unaware that Protected Public Lands, Wildlife Managed Areas and Parks, State owned Agricultural lands are not secure. This is a shame! That the Conveyance Act gives the General Assembly the ability to sell, trade, and give away public lands to a town, business, or even an individual. That this can be done without a Public Hearing or through late sessions amendments. This is also a shame!

I believe a Constitutional Amendment bill (S.J.5) is in order and needed to protect these Public lands and Parks. I have always enjoyed visiting many of our States Parks and natural areas. I would like my grandchildren, nieces and nephews to also have these areas available to them.
