As the First Selectman of the Town of Columbia I urge you not to pass GB5407. I am not sure why you would even consider such a bill which will cost the towns of CT a great deal of money if enacted. Why should someone with property valued at \$9,000 not have to pay and his neighbor who has personal property valued at \$11,000 have to pay? It makes little sense. I am told that the supporters of the bill say it will save time by requiring less work. These accounts still have to be tract, etc. etc. saving little if no work. I would think the legislature should spend time on more pressing needs like balancing the state budget rather than making more rules and mandates for towns. Thank you.
