The tax on Social Security is truly outrageous. I am a 75 year old retiree with my 2 younger sons (Corp. interns still being supported by me.) Having been self employed, I have no pensions nor capital coming in and only a low fixed income from investments and social security. I have a minor handicap from serving in Vietnam, which further makes life difficult.

Leaving CT. has been a discussion point in our household and this tax is our motivation to move out of Ct. to a state that is not 47th in state rankings, and where businesses and people are moving in, not out!!!!
