Yes income tax on Social Security should be eliminated. With the current economic climate our 401k has been seriously reduced, leaving us to rely on S/S to survive. Paying for Medicare plus a supliment takes a serious bite out of our money. Rents are on the rise, auto insurance is on the increase, food, just about everything is on the up swing but S/S payments remain about the same with only tint increase on occasion. We have worked hard, paid our taxes for 50 years I think it is time for the government gives its elderly a break.

Thank you,
