The CT tax burden on all CT citizens, especially those on limited income, such as retired seniors on social security, must be addressed. The expression "must be addressed" is because on a personal note, my husband and I, although it is truly not our desire, will be forced to leave CT and move to less financially burdensome state. We are currently living in an older adult community in CT and we hear the struggle of financial burden here in CT on a daily basis. Thank you for providing this opportunity for us to share our concern.
