I believe that Social Security is a contract that the U.S. Government has made with the American people...a promise that if we pay a portion of our income, we will be able to draw on those payments at retirement. We do not have a choice. We pay in as long as we are working. We should be confident that the government will keep their end of the bargain and not pilfer from us! To tax us on OUR own money, when most of us will be heavily dependent on this income, is just wrong!

Sincerely, JoAnne Fealy
