CT is losing seniors to competing states that do not tax social security so it is in CT's best interest to eliminate this tax and retain their seniors. We have other income such as pensions, 401k, etc that are opportunities for revenue for CT. This tax represents in effect a tax on a tax in that we paid into the payroll tax all our lives and now pay a tax on the payout of those funds.

I am looking at moving to Delaware where these funds are not taxed.
