If CT is EVER going to stop the bleeding and mass exodus out of this state this bill (HB#5062) would be a good place to start. If we are going to keep retirees from moving to any number of other states to retire to avoid being fleeced once again by burdensome state taxes, again , this would be a good place to begin restoring public confidence in the ability to stay fiscally sound without riding the backs of those that have contributed to the state their whole working lives...

Another possible upside to this bill would be that all the state educated and talented young people that also seem to be leaving the state as well, may reconsider jumping ship so soon if incentives like the aforementioned bill is passed. Hope for the future is a big concern when planning for tomorrow. Please pass the bill when it is presented and submitted for a vote...
