I'm a senior trying to exist on social security. My monthly payment seldom increases but prices and taxes on everything keeps going up. The only flexibility I have is with food which even then every item costs about \$5.00. So I don't eat a lot. Something has to give and reducing or eliminating any tax is a start. CT is ridicules when it comes to taxes. Do all you politicians think we grow money? Where do you think we get it from? Lauene Kapinos
