As a retiree on a fixed income I strongly support this bill. I have always resented paying income tax on my social security . I worked for companies that provided defined benefit pensions and worked hard to ensure I have a comfortable retirement. Social security increases have been minuscule to non- existent so giving up a portion of it to the state does not seem fair. Additionally, starting to take steps like this may help us consider remaining in Connecticut rather than move to a lower tax state.

Thank you for your representation!
