many of the people on SS do not have other income, this is an insurance guaranteed by the government and then they want us to give part of it back. No other insurance co. has ever done that or would it be allowed by the gov.
secondly there are BILLIONS of dollars given to foreign governments that hate us. How about taking care of your own? Many of which
have fought for this country some have not been able to join the military but worked in defense plants instead. THESE PEOPLE LOVE THIS COUNTRY yet they are treated like second rate citizens just because they are old.
