I support the proposal to eliminate personal taxes on social security benefits. Connecticut is becoming a more and more undesirable place to live due to our high taxes. I will be collecting social security within the next couple of years and it will be a huge help if my benefit is not taxable. Connecticut's retirees have paid high sales, income and property taxes throughout their lives. Let's join other "retiree-friendly" states and eliminate this extra burden.

Thank you,
Sharon Lynch
