I am not collecting social security yet but I am retired. My Cigna health care premium has increased 100% since I retired only (4) years ago. My premium has increased due to government mandates. This year I will be paying significantly more ct. Income tax vs. federal taxes. My pension is also taxed by the state. I actively looking to leave this state where I have lived my whole life. I fully support your bill but would also include pensions taxes be eliminated. I would also support state worker health care reform. State workers should be placed in Obamacare. If is good enough for us it should be for them . Never had a problem with the state workers health plan until I started getting cheated. Tax saving would be great and make our state competitive. I am sick of being ripped off by this state. My story is common and all my friends are leaving ct. Other people live in this beside state workers!
