This burdensome tax on social security benefits takes more living money from seniors. The problem we have is spending. There is not a program, benefit, and we are paying for far too many illegal and so called refugees. This will kill this country in the end. This state is headed down the path of bankruptcy or tax hikes into oblivion. Wake up and live within your means. If you can't, go into another line of work. The stranglehold the democrats have on the spending cannot go on any farther. Thank you.
