It is difficult enough for seniors to live on a fixed income. Contrary to popular belief the cost of living continues to rise - medical charges, groceries, auto repairs & home/rental demands. The state of Connecticut should not penalized seniors by taxing our social security benefit - that we worked over 55 years to finally get. We were taxed once and why do we have to be taxed again on a earned benefit. Please consider spending reductions in order to balance your budgets -  
- "WE DO"!
