I would like to see the personal income tax on Social Security benefits eliminated. Senior citizens struggle every day to try and make ends meet. The "golden years" were meant to be worry free. I see seniors still working longer than planned because they cannot pay for their healthcare, insurances, taxes, and basic living expenses such as food and clothing. Tax on top of tax on top of tax...that seems to be the norm. The seniors have paid into social security during their working years so other retirees can benefit. So the cycle continues, but there should not be an additional income tax burdern because of it.
