We get so little on social security that the tax dollars collected I would think have little impact on the budget. The money retained by seniors would have a significant impact. I have been trying to get a part time job to supplement my income and I am limited as to what I can physically still do! Therefore I am finding that the system be it federal, state or private more or less drains seniors one way or another. With no federal increases to social security seniors are going backwards as taxes rise and income is fixed. When I contacted Joe Courtney to Request that congress revisit the formula for social security increases due to it being tied to the cost of gas and there was no increase this year he told me he hadn't gotten a raise either. He also said he was working with John Larsen on this issue. Well I guess neither of them got anywhere. Not to mention this is coming from an elected official making 175000\$ a year .That's what we got going for us seniors in Washington. Let's see if you can get anywhere. I thank you for your efforts.
