Seniors are fleeing CT at an alarming rate, and I will be one of them. CT is consistently rated as one of the top two worst states to retire. It is a sad day, when after 68 years, we are working toward a move that takes us away from our heritage and family. But alas, we are like many others that can not make it here. Looking through my glasses, the only people in CT that have the means to stay will soon be only those that have state employee pensions.....which is the part that really makes me angry.
