I now collect social security and we have been told we will not get a raise this year. When we paid into social security all the years since I was sixteen it was a tax and we had to pay into it. Then they decided to tax it again as income. Now we are paying a tax on using the money that we put into social security because like everything else it is not put into a locked box. It is also being used to balance budgets and also being used to give to illegals money that they never put a cent into social security.

It is tough living on social security as it is not much and then you tax it. Give the senior citizens a break in CT as we are one of the most taxed state in the Union. I know a lot of seniors that are planning on leaving this state as it too hard to make ends meet on social security. My daughter and I might leave this state along with the rest of the people and the seniors leaving this state.
