The elimination of a tax on social security monies should be eliminated for at least the following reasons:

1. Monies have already been taxed previously as a payroll tax;
2. Many elderly rely on these monies as their only source of income;
3. Additional monthly income through the elimination of the tax may alleviate the need for supplemental funds ;
4. Many states have already implemented this change thus creating an enticement for relocation of retirees.

Thank you for your consideration of this testimony and please feel free to contact me for additional information and/or questions.
