I am 68 years old and I can't afford to retire because of the taxes in this state. It is harder every month to make ends meet and still be able to enjoy life. I plan to retire in 2 years when I am 70 and at that point I plan to leave the state so I can live a more comfortable financial lifestyle. I have a friend in Indiana that is losing her husband, and she wants so desperately to come home to Clinton, but knows she can't, because of the extremely high tax burden....such a shame....right here are 3 people that you won't be able to tax any longer.
